

ABSTRACT OF THE DISCLOSURE

An electronic component including an element main  
body section for performing an electrical function and  
a terminal section for electrically connecting the  
5 element main body section to a conductive member of  
an external device, the electronic component comprises  
a pair of sections arranged above the terminal section  
and opposite to each other in a stacking direction of  
the electronic component and a distance between the  
10 sections corresponding to a maximum thickness of the  
electronic component.
